

Weekly Report - Week 1

Student Name: John Doe

Period: June 1-7, 2025

Company: TechCorp Solutions

Summary:

This week I completed Python basics training and environment setup. I explored core concepts including variables, data structures, and control flow. Started hands-on exercises to practice the fundamentals.

Key Learnings:

- Python syntax and best practices
- Virtual environments and package management
- Basic data structures and algorithms
- Version control with Git

Next Week Goals:

- Start API development project
- Learn about REST principles
- Implement error handling patterns
